

Help the pilot find the wildfire!

This tree is full of animals that live in the forest. These critters find food, water, places to hide and raise their babies in the forests, fields, ponds, creeks, rivers, and mountains that make up this forest. A place that provides everything for survival is called a habitat. Circle the names of the animals - words are vertical, horizontal and diagonal.

Wildlife in the Forest

Tips from Smokey

1. Always be careful with fire.
2. If you find matches, give them to an adult.
3. Make sure your campfire is out before you leave.
4. If you see a fire burning, tell an adult.
